

unintentional typographical error in the oligonucleotide sequence of the nucleotide loop of B-22ALTGA oligonucleotide composition is corrected. In the original Specification the oligonucleotide sequence reads "GGAAA". The correct sequence now reads "GGAGG" (SEQ ID NO:14). Support for the amendment is found on page 30, line 14 and in the table on page 31 (see B-22ALTGA). On page 69, line 16 of the original Specification, a radioactively labeled compound [ $\gamma$ - $^{32}$ P]-ATP was incorrectly referred to as [g- $^{32}$ P]-ATP. This unintentional typographical error is obvious to one skilled in the art and was corrected in the Substitute Specification. A Marked-up Copy of Substitute Specification showing changes made relative to the original Specification is also enclosed. Inserted text is marked by underline (inserted text), and deleted text is marked by square brackets ([deleted text]).

### CONCLUSION

Early and favorable consideration is earnestly solicited. If the Examiner believes any informalities remain in the application that may be corrected by Examiner's amendment, or there are any other issues that can be resolved by telephone interview, a telephone call to the undersigned attorney is earnestly solicited.

Respectfully submitted,

By: Jeffrey B. Arnold
